# SAFETY DATA SHEET

Date of issue/Date of revision 27 August 2015

Version 2

## **Section 1. Identification**

: Inhibisil™ 73 Anti-Corrosion Pigment **Product name** 

**Product code** : 8000018 Other means of : Not available.

identification

: Powder.

**Product type** 

### Relevant identified uses of the substance or mixture and uses advised against

**Product use** : Industrial applications.

Use of the substance/

mixture

Additive

: None identified. **Uses advised against** 

: PPG Industries, Inc. **Supplier** 

One PPG Place Pittsburgh, PA 15272

**Emergency telephone** 

number

: (412) 434-4515 (U.S.)

**Technical Phone Number** : 1-800-243-6745 (Silica) 8am-5pm Eastern time

## Section 2. Hazards identification

**OSHA/HCS** status : While this material is not considered hazardous by the OSHA Hazard Communication

Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available

for employees and other users of this product.

Classification of the substance or mixture : Not classified.

**GHS** label elements

Signal word : No signal word.

**Hazard statements** : No known significant effects or critical hazards.

**Precautionary statements** 

**Prevention** : Not applicable. Response : Not applicable. **Storage** : Not applicable. **Disposal** : Not applicable.

Supplemental label

elements

: Safety Data Sheet available for professional user on request.

**United States** Page: 1/11

Product name Inhibisil™ 73 Anti-Corrosion Pigment

## Section 2. Hazards identification

Hazards not otherwise classified

: Mandling and/or processing of this material may generate a dust which can cause mechanical irritation of the eyes, skin, nose and throat.

## Section 3. Composition/information on ingredients

Substance/mixture : Substance

: Inhibisil™ 73 Anti-Corrosion Pigment **Product name** 

### **CAS** number/other identifiers

**CAS** number : 1344-95-2

Ingredient name	%	CAS number
Silicic acid, calcium salt	100	1344-95-2

Hydrated Amorphous Silica @ 84-85%, Calcium as Calcium Oxide @ 8%, Moisture @ 7-8%. Contains no detectable crystalline silica (detection limit <0.1% by weight).

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

#### **Description of necessary first aid measures**

**Eye contact** : Remove contact lenses, irrigate copiously with clean, fresh water, holding the evelids apart for at least 10 minutes and seek immediate medical advice.

: Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is Inhalation

irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.

Skin contact

: Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser.

Ingestion : If swallowed, seek medical advice immediately and show this container or label. Keep

person warm and at rest. Do NOT induce vomiting.

#### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

**Eve contact** : No significant irritation expected other than possible mechanical irritation.

Inhalation Exposure to airborne concentrations above statutory or recommended exposure limits

may cause irritation of the nose, throat and lungs.

Skin contact : Prolonged or repeated contact may dry skin and cause irritation.

Ingestion : No known significant effects or critical hazards.

#### Over-exposure signs/symptoms

**United States** Page: 2/11

Product name Inhibisil™ 73 Anti-Corrosion Pigment

## Section 4. First aid measures

**Eye contact** : Adverse symptoms may include the following:

> irritation redness

Inhalation : Adverse symptoms may include the following:

coughing

Respiratory tract irritation

**Skin contact** : Adverse symptoms may include the following:

dryness

Ingestion : No specific data.

### Indication of immediate medical attention and special treatment needed, if necessary

: Treat symptomatically. Contact poison treatment specialist immediately if large Notes to physician

quantities have been ingested or inhaled.

**Specific treatments** : No specific treatment.

**Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training.

### See toxicological information (Section 11)

## Section 5. Fire-fighting measures

## **Extinguishing media**

Suitable extinguishing

media

: Use an extinguishing agent suitable for the surrounding fire.

**Unsuitable extinguishing** 

media

: None known.

Specific hazards arising from the chemical

**Hazardous thermal** decomposition products : When transferring material into flammable solvents, use proper grounding to avoid electrical sparks.

: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Special protective actions for fire-fighters

No action shall be taken involving any personal risk or without suitable training.

**Special protective** equipment for fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

## Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

: No action shall be taken involving any personal risk or without suitable training. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Product forms slippery surface when combined with water.

For emergency responders: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".

> **United States** Page: 3/11

Product name Inhibisil™ 73 Anti-Corrosion Pigment

## Section 6. Accidental release measures

: Inform the relevant authorities if the product has caused environmental pollution **Environmental precautions** 

(sewers, waterways, soil or air).

### Methods and materials for containment and cleaning up

**Small spill** : Vacuum or sweep up material and place in a designated, labeled waste container.

Large spill : Vacuum or sweep up material and place in a designated, labeled waste container.

**Reference to other sections**: See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal protective equipment.

See Section 13 for additional waste treatment information.

# Section 7. Handling and storage

#### Precautions for safe handling

**Protective measures** 

: Fut on appropriate personal protective equipment (see Section 8). Avoid alteration of product properties before use. Calcining (which may result in crystalline formation) or mixing with additives may alter toxicological properties.

When transferring material into flammable solvents, use proper grounding to avoid electrical sparks.

Advice on general occupational hygiene Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

including any incompatibilities

Conditions for safe storage, : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Do not store in unlabeled containers.

## Section 8. Exposure controls/personal protection

### **Control parameters**

### Occupational exposure limits

Ingredient name	Exposure limits
Sílicic acid, calcium salt	OSHA PEL (United States, 2/2013).  TWA: 5 mg/m³ 8 hours. Form: Respirable fraction  TWA: 15 mg/m³ 8 hours. Form: Total dust ACGIH TLV (United States, 4/2014).  TWA: 10 mg/m³ 8 hours.

### Key to abbreviations

Α	Acceptable Maximum Peak	S	<ul> <li>Potential skin absorption</li> </ul>

С	= Ceiling Limit	SS	<ul> <li>Skin sensitization</li> </ul>

**United States** Page: 4/11

Product name Inhibisil™ 73 Anti-Corrosion Pigment

## Section 8. Exposure controls/personal protection

= Short term Exposure limit values

**IPEL** = Internal Permissible Exposure Limit TD = Total dust

**OSHA** = Occupational Safety and Health Administration. TLV = Threshold Limit Value R = Respirable **TWA** = Time Weighted Average

= OSHA 29CFR 1910.1200 Subpart Z - Toxic and Hazardous Substances

## Consult local authorities for acceptable exposure limits.

# procedures

Ζ

**Recommended monitoring**: If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

### Appropriate engineering controls

or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

### **Environmental exposure** controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## Individual protection measures

### **Hygiene measures**

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is

## Eye/face protection Skin protection **Hand protection**

Safety glasses with side shields.

necessary. : Leather, Cloth, Rubber gloves.

#### **Body protection**

**Gloves** 

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

### Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

#### Respiratory protection

: If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

## Section 9. Physical and chemical properties

**Appearance** 

Physical state : Granulate Solid or powder.

Color : White.

Odor : Odorless.

Odor threshold : Not applicable.
pH : 6.5 to 7.5

Melting point : Not applicable.

Boiling point : Not applicable.

Flash point : Closed cup: Not applicable.

Auto-ignition temperature: Not applicableDecomposition temperature: Not available.Flammability (solid, gas): Not available.Lower and upper explosive: Not applicable.

(flammable) limits

Evaporation rate : Not applicable
Vapor pressure : Not applicable.
Vapor density : Not applicable.
Relative density : Not available.

**Solubility** : Insoluble in the following materials: cold water.

Partition coefficient: n-

octanol/water

: Not available.

Viscosity : Not applicable.

Volatility : 0% (w/w)

% Solid. (w/w) : 100

## Section 10. Stability and reactivity

**Reactivity**: No specific test data related to reactivity available for this product or its ingredients.

**Chemical stability** : The product is stable.

Possibility of hazardous reactions

: Under normal conditions of storage and use, hazardous reactions will not occur.

**Conditions to avoid** : Stable under recommended storage and handling conditions (see Section 7).

High temperature (>800 C) treatment (calcining).

Avoid alteration of product properties before use. Calcining (which may result in crystalline formation) or mixing with additives may alter toxicological properties.

Refer to protective measures listed in sections 7 and 8.

**Incompatible materials**: Keep away from the following materials to prevent strong exothermic reactions:

oxidizing agents, strong alkalis, strong acids.

products

## **Section 11. Toxicological information**

### <u>Information on toxicological effects</u>

**Acute toxicity** 

**Conclusion/Summary** 

: No known significant effects or critical hazards.

**Irritation/Corrosion** 

Conclusion/Summary

Skin

: Prolonged or repeated contact may dry skin and cause irritation.

: Exposure to airborne concentrations above statutory or recommended exposure limits

may cause irritation of the eyes.

Respiratory : Exposure to airborne concentrations above statutory or recommended exposure limits

may cause irritation of the nose, throat and lungs.

**Sensitization** 

**Eyes** 

**Conclusion/Summary** 

Skin : No known significant effects or critical hazards.Respiratory : No known significant effects or critical hazards.

**Mutagenicity** 

**Conclusion/Summary**: No known significant effects or critical hazards.

**Carcinogenicity** 

**Conclusion/Summary**: No known significant effects or critical hazards.

Reproductive toxicity

**Conclusion/Summary**: No known significant effects or critical hazards.

**Teratogenicity** 

**Conclusion/Summary**: No known significant effects or critical hazards.

Specific target organ toxicity (single exposure)

Not available.

Specific target organ toxicity (repeated exposure)

Not available.

<u>Target organs</u>: Contains material which may cause damage to the following organs: upper respiratory

tract, skin, eyes.

**Aspiration hazard** 

Not available.

Information on the likely routes of exposure

Potential acute health effects

**Eye contact**: No significant irritation expected other than possible mechanical irritation.

Inhalation : Exposure to airborne concentrations above statutory or recommended exposure limits

may cause irritation of the nose, throat and lungs.

**Skin contact**: Prolonged or repeated contact may dry skin and cause irritation.

United States Page: 7/11

Product name Inhibisil™ 73 Anti-Corrosion Pigment

## Section 11. Toxicological information

**Ingestion**: No known significant effects or critical hazards.

Over-exposure signs/symptoms

**Eve contact**: Adverse symptoms may include the following:

irritation redness

**Inhalation** : Adverse symptoms may include the following:

coughing

Respiratory tract irritation

**Skin contact**: Adverse symptoms may include the following:

dryness

**Ingestion**: No specific data.

### Delayed and immediate effects and also chronic effects from short and long term exposure

**Conclusion/Summary** 

An epidemiological study was conducted which included 165 precipitated silica workers who had been exposed an average time span of 8.6 years. Of these 165 workers, 44 had been exposed for an average of 18 years. No adverse effects were noted in complete medical examinations (including chest roentgenograms) of these workers. Pulmonary function decrements were correlated only with smoking and age but not with the degree or duration of dust exposures. Laboratory studies have also been conducted in small animals via inhalation of levels of precipitated silica dust of up to 126 mg/cu.m. per periods from six months to two years. Although precipitated silica was temporarily deposited in the animals' lungs, most of the deposited material was cleared soon after the dust exposure ended. The results of all studies performed by, or known to, PPG indicate a very low order of pulmonary activity for synthetic precipitated silicas. PPG recommends that persons with breathing problems or lung disease should not work in dusty areas unless a physician approves and certifies their fitness to wear respiratory protection.

Note: The information above is for untreated hydrated amorphous silica. Calcium modified silica would be expected to have the same toxicological properties.

Short term exposure

**Potential immediate** 

effects

: Exposure to airborne concentrations above statutory or recommended exposure limits

may cause irritation of the nose, throat and lungs.

No known significant effects or critical hazards.

Long term exposure

**Potential immediate** 

effects
Potential delayed effects

Potential delayed effects

Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs.

: No known significant effects or critical hazards.

Potential chronic health effects

General : Repeated or prolonged inhalation of dust may lead to chronic respiratory irritation.

Carcinogenicity: No known significant effects or critical hazards.Mutagenicity: No known significant effects or critical hazards.Teratogenicity: No known significant effects or critical hazards.Developmental effects: No known significant effects or critical hazards.Fertility effects: No known significant effects or critical hazards.

**Numerical measures of toxicity** 

**Acute toxicity estimates** 

Not available.

Soil/water partition coefficient (Koc)

: Not available.

## Section 13. Disposal considerations

**Disposal methods** 

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
